

Innovators in Agriculture Camp

When: JUNE 25 – JULY 25

This interactive program will introduce students to the technology and innovations that are currently being used for food production and environmental sustainability. Virtual demonstrations, interactive exercises, and virtual tours will make up a big portion of the program. Students will be able to go through all the modules, select an area of most interest and “pitch” a problem solving concept related to agriculture to a panel of judges. This will be a great opportunity to meet people from across the state and share ideas about how to feed the world with the help of technology!

June 25th: VIRTUAL INNOVATORS in AGRICULTURE PARTY will kick off the program. Meet the experts and other participants in the program!

July 25th: SHOW US YOUR PITCH! Participants will have the opportunity to give a pitch or demonstration explaining your idea!

Registration:

FREE!

For Ages:

15-18
